

Chart 2. A Human-Environment Inquiry

Country	
Current population	
Projected population, 2025	
Annual growth rate	
Percent of population under age 15	
Doubling time (at current rate)	
Average number of children per woman (fertility rate)	
Infant deaths per 1,000 live births	
Life expectancy	Male: Female:
Main causes of death	
Persons per square mile (density)	
Percent urban	
Percent of land protected	
Wetlands loss	
Change in forest area	
Daily water use per capita	
Percent of population with access to safe water	
Percent of population with adequate sanitation	
Water use for domestic purposes	
Water use for agriculture	
Water use for industry	
Water use for energy production	
Cropland per capita	
Energy use per capita	
CO ₂ emissions per capita	
Number of vehicles per 1,000 people	
Adults who are high school graduates	Male: Female:
Elected officials who are women	
Labor force in agriculture	
Labor force in industry	
Labor force in services	
GNI PPP per capita	
Percent of population living in poverty
