## Definitions

**Lifetime Births per Woman (TFR):** The total fertility rate, defined as the number of children a woman would have if current age-specific fertility rates remain constant throughout her childbearing years.

**Percent of Women Ages 15-19 Giving Birth in One Year:** Births per 1,000 women ages 15-19 (the age-specific fertility rate), divided by 10.

**Contraceptive Use:** The percentage of married or “in-union” women ages 15-49 who are currently using contraception. “Any method” includes modern and traditional methods. “Modern” methods include clinic and supply methods such as the pill, injectables, implants, IUD, condom, and sterilization.

**Percent of Births Attended by Skilled Personnel:** Skilled personnel include doctors, nurses, and midwives.

**Maternal Deaths per 100,000 Live Births:** Also known as the maternal mortality ratio, the number of deaths to women per 100,000 live births that result from conditions related to pregnancy, delivery, and related complications.

**Lifetime Chance of Dying From Maternal Causes:** The probability that a woman will die during her lifetime from causes related to pregnancy and delivery. The measure combines the probability of becoming pregnant and the risk of death from each pregnancy (as measured by the 2000 maternal mortality ratio).

**Percent Literate Ages 15-24:** Also known as the youth literacy rate. UNESCO defines literacy as a person who can, with understanding, both read and write a short simple statement on his or her everyday life.

**Percent Enrolled in Secondary School:** The ratio of the number of students enrolled in secondary school to the population in the applicable age group (such as ages 12 to 17) for the country (gross enrollment ratio). It can exceed 100 when the number of students currently enrolled exceeds the population of the relevant age group.

**Female Secondary School Enrollment as Percent of Male Enrollment:** The ratio of the female enrollment rate to the male enrollment rate for secondary school.

**Percent Economically Active Ages 15+:** The proportion of the population over age 15 that is classified as either employed or unemployed, i.e., all those who supply labor or are available to supply labor. Classifications can vary by country.

**Women as Percent of Nonfarm Wage Earners:** Women’s paid employment in nonagricultural sectors (i.e., industry or services) as a percentage of total nonagricultural employees.

**Women as Percent of Parliament:** The percentage of seats in the single or lower chamber of the national parliament that are held by women.

**More developed regions,** following the UN classification, comprise all of Europe and North America, plus Australia, Japan, and New Zealand. All other regions and countries are classified as **less developed.** Sub-Saharan Africa includes all countries of Africa except the northern African countries of Algeria, Egypt, Libya, Morocco, and Tunisia.

## Notes

— Data are unavailable or inapplicable

*Italics* Data refer to year prior to 1995 for reproductive health indicators and prior to 2000 for educational indicators

z Less than 0.5 percent

a Data do not include Hong Kong and Macao Special Administrative Regions (SAR)

b Former Yugoslav Republic

c As of January 2003

**MDG** Indicator related to the UN’s Millennium Development Goals

2000/2004 Data refer to the most recent estimate available during that period

## Abortion policy

- Prohibited, or permitted only to save a woman’s life.
- Permitted only to save a woman’s life and in one or more special cases such as rape, incest, or fetal impairment or abnormality. Spousal and/or parental consent required in some countries.
- Ⓛ Permitted on physical or mental health grounds, and in some countries, in one or more special cases listed in the previous category. Spousal and/or parental consent required in some countries.
- Permitted on broad socioeconomic grounds and health grounds or without restriction as to reason, with gestational limits. Certain other restrictions may apply such as spousal and/or parental consent.
